

Reliable, Sturdy Ring Buoy Cabinets by Aquatic Technology

Durable, Environmentally Resistant Construction

Constructed from non-corrosive materials engineered for exposure to weather, UV, and pool chemicals in demanding aquatic environments.

Flexible Configuration Options

Available with or without USCG-certified ring buoys. Cabinet sizes offered in 20", 24", and 30" to accommodate facility requirements.

Integrated Safety Accessories Included

Each cabinet includes a built-in hook for buoy and throw line storage, a 60-foot emergency heaving line, and a foot anchor.

Secure Door Latching System

Equipped with a lift-latch handle to secure the door and prevent unintended access. Clear polycarbonate door allows for quick visual identification of the buoy during emergencies.

Safety Station Cabinet Specifications
