

Natural Pool Cooling Through High-Efficiency Water Aeration

The Aquatic Technology Cooling Cannon naturally reduces warm pool water temperatures by utilizing evaporative cooling while increasing dissolved oxygen. Its portable design and ready-to-use operation make it ideal for commercial aquatic facilities.

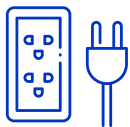

High-Performance Cooling

- Up to 15°F temperature reduction*
- 80 GPM flow rate
- Adjustable, high-volume sprayers

Portable Design

- Marine-grade HDPE cart
- 10" semi-pneumatic wheels
- Aluminum-reinforced handle

Ready-to-Use Design

- 115V / 15 Amp
- 50' GFCI power cord
- Waterproof controls

Water Quality Benefits

- Aerates water
- Increases dissolved oxygen
- Helps reduce algae & bacteria

Specifications

SPECIFICATIONS	VALUE
MODEL	AQWC101520A-V01
PUMP	1 HP
FLOW RATE	80-100 GPM
ELECTRICAL	115V, 15 AMP, GFCI
COOLING	Up to 15°F*
COMPONENT CERTIFICATIONS	VBGA, NSF, CPSC, UL, DOE

Ideal Applications:

- Municipal Pools
- Universities
- Competition Pools
- Water Parks
- Hotels & Resorts
- Community Pools

*Actual temperature reduction will vary based on ambient air temperature, humidity, wind conditions, and operating time.
