

WELLNUT INSTALLATION INSTRUCTIONS SHEET

1. Lay sign to be installed on sign stand in desired location and mark the location of each mounting hole on the sign stand.

NOTE: Due to variances in sign sizes and grommet placement, each installation should be made specifically for the sign to be installed on that stand. Once the wellnuts are installed in the stand, other signs may not have mounting holes that are compatible.

2. Using a 15/32" drill bit, drill a hole in each location marked on the sign stand in step one. This hole should be through only one layer of the plastic, allowing you to insert the wellnut into the hole until the rubber flange is flush with the sign stand.

3. Place the sign on the stand so the mounting holes align with the installed wellnuts and screw the bolt into the wellnut, securing the sign to the stand.
