

ATTENTION INSTALLER

NOTICE

For Above Water Level Installations Only

***For Below Water Installations Order the
DEL Flow Switch Kit (P/N EUV-FS-01)
Which Must Be Installed With This Unit***

The DEL UV-C 50 is shipped configured for the most common pool installation location, which is above water level. In the event that the UV-C 50 will be installed below water level, *a Flow Switch Kit must also be installed* to ensure that the system does not turn on without adequate flow. Failure to do so will result in damages not covered under warranty.
