E-Z PATCH® 4
POOL & TILE REPAIR SUPPLIES

WHITE POOL TILE GROUT

E-Z INSTRUCTIONS:

1. Lower pool water to 6" below the repair area.

2. Remove all loose material or grout.

3. Add LIQUID CEMENT BONDER to **E-Z PATCH 4®** DRY CEMENT MIX (use fractions = ¼ of the dry mix to ¼ of the liquid cement bonder, etc.). Add water and mix (stir) until you get the consistency of "mashed potatoes".

4. Completely fill area to be grouted and allow to partially dry (approx. 5 min.).

5. Using a damp sponge, lightly wipe off excess grout leaving joint full and flush. Rinse sponge often.

6. When grout is dry, polish residual "haze" off with a dry, clean cloth taking care to keep the cloth dry during this polishing period.

You may refill water the next day

To make a Custom Color with any of our cement type repair supplies, use any cement dye.

View our instructional repair video showing how to do this repair at www.e-zpatch.com

E-Z ANSWERS to some Frequently Asked Questions

- **Liquid Bonder is inside the jar**
- **Product will cure faster in hotter weather, slower in cooler weather**
