

# Genuine Hayward TurboCell®

SALT CHLORINATION CELL

The best quality. The best value.  
The best choice.

In pools across America, genuine Hayward TurboCells have delivered proven reliability for the past two decades. Known for their high quality, long life and NSF certification, it's no wonder Hayward TurboCells are the #1 salt chlorination cell in the world with over 1 million installations.

# IT'S ALL ABOUT TRUST.

## Why would you go with any other cell?

### Genuine Hayward TurboCells:

- Best value and longer life
- Independently certified by the National Sanitation Foundation (NSF)
- Industry-best warranty
- Backed by one of the oldest and largest U.S. pool equipment companies
- Independent safety certification for use with Hayward salt chlorinators

### Beware of Imitations

Other salt chlorination cells may talk a good game, but what they don't say will cost you. With other replacement cells, you get what you pay for: lower quality, shorter life, non-certification.

#### Why imitators offer poor value:

- Generic cells are not safety certified for use with Hayward salt chlorinators
- Through independent tests by the leading authority in electrolytic cells, some generic cells have been shown to have 75% less operating life than a genuine Hayward T-CELL-15

### Comparing Values

Hayward TurboCells are not only the superior salt chlorination cell, they're the superior value in every way. See for yourself why genuine Hayward TurboCells are the better value.

### Important Salt Cell Facts

Cell	Pool Size Rating	Total Pounds of Free Chlorine Produced (as Trichlor)	Cost per Pound of Chlorine
Hayward T-CELL-3	15,000 gallons	210 lbs*	\$
