

Orenda App

Color Codes

What the colors mean on the Orenda App

At the bottom of the Orenda App, the LSI number can be four different colors. From high-LSI to low:

- (> +0.30) **PURPLE** means your water is over-saturated with CaCO_3 . This is scale-forming water.
- (0.00 - +0.30) **GREEN** is ideal LSI balance. This should be the target range.
- (-0.30 - -0.01) **YELLOW** is acceptable, but not desired. You're close to balance, but not quite there.
- (< -0.30) **RED** is aggressive water that will etch cement and damage equipment. The lower, the worse!

Calculator Type: Residential Commercial

Pool Gallons: Enter Quantity

Current Levels				Desired Levels		
-	80	+	Temperature	-	80	+
-	1	+	Chlorine*	-	2	+
-	7.2	+	pH	-	7.6	+
-	120	+	Calcium	-	220	+
-	80	+	Alkalinity	-	80	+
-	0	+	Stabilizer	-	0	+
-	0	+	Salt/TDS	-	0	+
-	500	+	Phosphates*	-	0	+

-0.67 LSI **0.00**

*Chlorine and Phosphate level do not influence LSI calculation
