RAMUC INTRODUCES HIGH-PERFORMANCE MILDEW AND MOLD-RESISTANT COATING

Hickory, N.C., - Ramuc® MPC-34™ is a self-priming, high performance, water-based wall paint specially formulated for areas prone to moisture. Compatible over solvent or water-based coatings, its durable satin finish easily withstands the humid, challenging conditions that promote unsightly mildew growth and cause paint failures. Ramuc MPC-34 provides a moisture resistant, mold and mildew proof finish that will stay bright and colorfast for years. This product dries fast with low odor and its water-based formula allows not only easy application but cleans up with soap and water. MPC-34's base formulation is white, but can be tinted up to 5% to create custom colors or match existing wall colorings.

Ideal for all interior surfaces, such as drywall, wood, primed or previously painted wood and metal, cured plaster, cement, poured concrete and stucco, concrete block, vinyl paneling, aluminum, laminates, and even ceramic tile. Ramuc MPC-34 is the perfect paint for bathrooms, locker rooms, natatoriums, steam rooms or anywhere mold & mildew is a concern.

About Ramuc Aquatic Coatings: Ramuc is a leading manufacturer of specialty coatings that has been trusted for almost 90 years to protect and rejuvenate swimming pools, spas, slides, and more. We have and will continue to keep customer service as our primary goal along with our commitment to producing high quality coatings.
