Part # FLED-LAU-W  
▪ 80% Brighter  
▪ iStar Compatible  
▪ Memory Function

\*Upgrade kits are available to bring previous generation Treo light assemblies up to the current generation. If you have the previous generation lamps (FLED-LAU-DIP), and desire to upgrade to the current generation, you must change **ALL** the lamps to the current generation (FLED-LAU-C/W) for proper syncing and consistent brightness.

**IMPORTANT:** DO NOT MIX AND MATCH PREVIOUS AND CURRENT GENERATION LAMPS.
