- 6012 – (6' to 12') (S)
- *6317 – (6' to 17') (S)
- 6016 – (8' to 16') (S)
- *6323 – (8' to 23') (S)

ALL LENGTHS ARE APPROXIMATE

ALL LENGTHS ARE APPROXIMATE

(C) Internal Cam Poles are made with a unique cam plug that has been pressed into the inside pole and has a cam or shoe that is easily replaced when worn. This internal cam comes in all Dually, Brute Series, and 5009/5096 poles.

(E) EliptiLock™ with its design builds the lock into the tubes. There are no parts to fall out or break! The outside tube is formed slightly out of round and the inside tube is equally out of round which creates the friction for the lock. Over the last 40 years, The EliptiLock has become an industry favorite of many professionals.

(N) NIC – Nylon Internal Cam or NIC is a one piece cam that has a hole at the bottom for quicker draining. This cam is designed to be a quick on and off lock.

(O) Outside Lock has been an industry favorite since 1959 and is made with the strongest plastics on the market. The male fittings are pressed onto the outside tubes with a ton of pressure to ensure they will not fall off. The female and ferrule fittings are easily replaceable when worn to maximize the lifetime of the tube.

(S) SNAPLITE – Skimlite's newest lock design that allows you to slide and lock the pole at your desired length with a simple push of a button.

The 3118 and 3516 are heavy duty versions of the industry favorite 3008 and 3500. We have incorporated the same EliptiLock concept into stronger and thicker poles for added strength and life

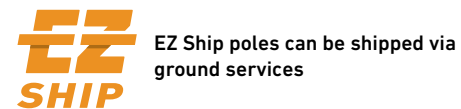

CARBONLITE

Revolutionary Pole Made for the Most Extreme Jobs

The All New CARBONLITE is unlike any pole on the market

Our new, proprietary manufacturing process makes the CarbonLite pole the absolute best Carbon Fiber pole in the industry. CarbonLite Series poles stay stiff and straight even when fully extended and are ideal for anyone who demands only the best—whether they are a dedicated service professional or a homeowner with a discerning eye. Skimlite's long history of quality continues with CarbonLite.

STIFFEST, STRONGEST, AND LIGHTEST CARBON FIBER ON THE MARKET

ALL LENGTHS AVAILABLE

CL411L** (EZ Ship CarbonLite 4.5'-11' Lever Lock)

CL612L* (CarbonLite 6'-11' Lever Lock)

CL615L** (EZ Ship CarbonLite 5.5'-15' Lever Lock)

CL617L** (CarbonLite 6'-17' Lever Lock)

CL8XT (CarbonLite 8' Extension)

(L) - Lever Lock

ALL LENGTHS ARE APPROXIMATE

(XT) - Extension

(2 Piece) * (3 Piece) **

HANDGRIP

- Easily remove hand grip with a push of a button for quick replacement or alternative tool attachment.

DECAGON TUBES

- Internal 10-sided decagon tubes for superior strength and grip.
- Decagon shape prevents the pole from twisting while in use.
- Ideal for maneuvering heavy vac systems without worry.

QUICK LOCK LEVER

- Ambidextrous lock lever! Simply change the levers to either side of the pole to fit your cleaning preference.

CARBON FIBER

- Skimlite's CarbonLite Series are the only 100% Carbon Fiber Poles in the industry.

STAINLESS STEEL

- Stainless Steel tip accepts all industry standard tools.
- 4-hole drain for quicker removal of water.

Homeowner Poles

American-Made lighter weight tubing

- 1612 – (6' to 12' EliptiLock) (E)
- 1612e – (6' to 12' External Lock) (O)
- 1612nic – (6' to 12' Internal Cam) (N)

SKIMLITE HAS THE IDEAL EQUIPMENT FOR YOUR APPLICATION!

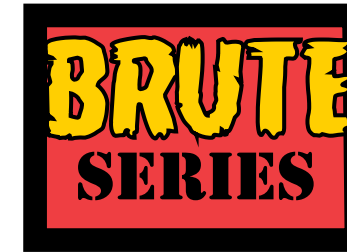

- (C) Internal Cam Poles are made with a unique cam plug that has been pressed into the inside pole and has a cam or shoe that is easily replaced when worn. This internal cam comes in all Dually, Brute Series, and 5009/5096 poles.
- (E) EliptiLock™ with its design builds the lock into the tubes. There are no parts to fall out or break! The outside tube is formed slightly out of round and the inside tube is equally out of round which creates the friction for the lock. The EliptiLock has become an industry favorite of many professionals and out sells any of our other poles.
- (N) NIC – Nylon Internal Cam or NIC is a one piece cam that has a hole at the bottom for quicker draining. This cam is designed to be a quick on and off lock.
- (O) Outside Lock has been an industry favorite since 1959 and is made with the strongest plastics on the market. The male fittings are pressed onto the outside tubes with a ton of pressure to ensure they will not fall off. The female and ferrule fittings are easily replaceable when worn to maximize the lifetime of the tube.
- (S) SNAPLITE – Skimplite's newest lock design that allows you to slide and lock the pole at your desired length with a simple push of a button.

Specialty Poles

(single ship poles)

All Brute Series poles are larger in diameter and stronger than conventional poles. These were created to satisfy those who use heavy vac systems or who just prefer to have the absolute heaviest and strongest aluminum pole available. Brute Series poles also have the ability to achieve even longer length by simply snapping on 54321's which are 8' extensions (see below).

EZ SHIP All poles with an EZ-Ship logo can ship as a single item via "SMALL PARCEL"

BRUTE 2, 3*, & 4** Section Poles

- *9416 – (5' to 15') (C) (O) (EZ)
- 9816 – (8' to 16') (C) (O)
- *9618 – (6.5' to 18') (C) (O) (EZ)
- *9824 – (8.5' to 23.5') (C) (O)

- *5432 – (8.5' to 23.5') (O)
- 54321 – (8' Extension for above poles)

54321 – This 8' extension allows for all Brute Series poles to achieve any desired total length. Each 8' extension is easily snapped on with stainless steel clips. For example: The Brute Series pole 9816 is an

8'-16' telescoping pole. By adding one 54321 to this pole you can achieve a total length of 24'. Why not add another to achieve a total length of 32'? The 54321 is a simple way to make any Brute Series pole extremely versatile.

EZ-SHIP STRAIGHT POLES

EZ-SHIP poles are designed to eliminate costly freight charges. We use our conventional commercial/service grade quality aluminum and design them to easily snap together with stainless steel clips (eliminating a need for any locking cams). Each set comes with a hand grip and solid aluminum extensions to achieve your desired length.

- #318 – (6' to 18')
- #216 – (8' to 16')
- #324 – (8' to 24')

Spartan Brushes and Rakes

Due to popular demand, Skimplite is now offering an imported price competitive line of Brushes that are still service quality. Spartan Brushes come with ALL METAL handles for extra strength, as well as Patented magnetic end caps. These magnetic end caps add 4" of extra bristle length, and makes removing metal objects from the bottom of the pool a simple task.

Spartan All Grit Brush 22"

SP1022 – Pebble "Grit" Brush

The Stainless Steel Replacement

- Silicon Carbide (same material used on street sweepers)
- Does not Rust like stainless steel
- Does not Poke like stainless steel
- Thicker, larger, and longer lasting Bristles than stainless steel that make it ideal for rougher surfaced pools such as Pebble tech and, Diamond brite,
- Safe to use on new plaster pools unlike stainless steel
- Floats does not sink like stainless steel making it easy to skim if bristles become dislodged
- Treats black algae without scratching pool surfaces unlike stainless steel

Spartan All Purpose Nylon Brush 22"

SP2022 – All purpose PBT (Polybutylene) Brush

The PP (Polypropylene) Replacement

- PBT is stronger, thicker and harder than the standard PP bristles used in the industry which allows for more efficient brushing
- PBT does not become brittle and deteriorate quickly like PP
- PBT is heat and cold resistant when compared to PP (a weather sensitive material)

Spartan Combo Brush 22"

SP3022 – Combo 50/50 Brush

- Combines Grit (Silicon Carbide) and PBT (Polybutylene) bristles for the best of both worlds

Due to popular demand, Skimplite is now offering an imported price competitive line of Leaf Rakes that are still service quality. The Spartan Series Rakes have the shape of conventional Rakes as well as a leafing edge around the entirety of the Rake. All components of the Spartan rake are easily replaceable.

Spartan Standard Rake

- SP100 Spartan Standard Rake
- SP101 Standard Rake Rim Replacement
- SP102 Standard Rake Net Replacement

Spartan Deep Net

- SP200 Spartan Standard Rake w/Deep Net
- SP101 Standard Rake Rim Replacement
- SP202 Standard Deep Net Replacement

Spartan Fine Mesh Net

- SP300 Spartan Rake Standard w/Fine Mesh
- SP101 Standard Rake Rim Replacement
- SP302 Fine-Mesh Replacement Net

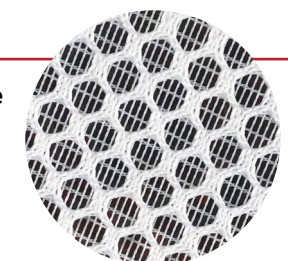

Spartan 19" Wide Mouth Deep Net

- SP400 Spartan 19" Wide Mouth Deep Net
- SP401 Wide Mouth Rim Replacement
- SP402 Wide Mouth Net Replacement

Spartan Easy Flip/Rag Bag

- SP500 Spartan Easy Flip Rake/Rag Bag Rake
- SP101 Standard Rake Rim Replacement
- SP502 Spartan Easy Flip Replacement Net

Leaf Skimmers & Rakes *handcrafted 100% in the USA*

For over 60 years, professionals and homeowners alike have relied on Skimlite's quality leaf skimmers and rakes. Today we still hand make over 15 models and designs 100% in the USA.

Stainless Steel Leaf Rakes and Skimmers

In 1954, Skimlite combined the strength of 304 stainless steel and plated spring steel fabricated to a solid handle to create the first light weight skimmer for the swimming pool industry. These original leaf skimmers and rakes are made to provide many years of use for the commercial pool application or homeowner.

- R4C Round Skimmer 4" RKFC Leaf Rake w/10" Fine Pocket
- S4C Square Skimmer 4" R16C Leaf Rake w/16" Fine Pocket
- R8C Round Skimmer 8" RK88 Leaf Rake w/16" Coarse Pocket
- S8C Square Skimmer 8"

Durapro Series

This design uses our original plated spring steel frame which won't rust, corrode, or break under normal use. The net is adhered to the frame with our patented method and has protective vinyl tubing around the frame that can be replaced when worn.

- SS4 Square Skimmer w/4" Pocket SS10 Leaf Rake w/10" Pocket
- SS8 Square Skimmer w/8" Pocket SS16 Leaf Rake w/16" Pocket

Skimlite's Maxi Series: M-16

Skimlite's Maxi Series incorporates many of the great features of our previous models into our patented design. The Pocket "stays" are sewn into the pocket to create a large opening for skimming, yet closes when pulled straight back. Using the Maxi Series like a brush on the bottom of a pool makes cleaning even the dirtiest of pools a snap! By keeping the pocket open, emptying this rake is even easier. Whether you use the leafing edge or the rounded edge of the protective tubing, the Maxi Series allows debris to float into the pocket with very little effort.

- M-16 20"x10" frame w/16" pocket
- M-80 20"x10" Frame w/16" Coarse Mesh pocket

Promax

The Promax rake incorporates many of the great features of our previous models, however has the conventional shape of standard rakes. This rake is light weight and flows through the water with very little effort.

- 7217 20x10 Frame w/16" pocket

Custom Poles

At Skimlite. Poles are our specialty, and we have the capability to manufacture all different types of poles for many different applications. Since 1954, when Robert Conrad founded Skimlite, we manufactured exclusively for the swimming pool industry. Over the years, we have expanded into other industries; with the pool industry still as our primary focus. For Inquiries on larger volume custom products, please visit our website at skimlite.com and email Customerservice@skimlite.com. We will always continue to innovate to manufacture high quality products you can depend on. Thank you for continuing to support our small family owned business.
