

Pool Blaster® Max Li

Our flagship product of the Pool Blaster® Line

As the flagship product of the Pool Blaster® Line, the Pool Blaster® Max Li shattered the mold of traditional pool cleaners. Initially introduced as the Pool Buster Max*, the unit has been redefining the world of pool maintenance since 2001, and has acted as a springboard for the design of the rest of Water Tech's battery powered Pool Blaster® Line.

Every detail of the Pool Blaster® Max Li has been carefully thought out to maximize efficiency and convenience. Featuring a high flow pump and industry leading suction, the MAX Li provides extra power for deep cleaning. The Pool Blaster® MAX's Li high capacity filter holds more dirt and debris and tackles the largest of messes with ease. Maintenance of the Pool Blaster® MAX Li is a breeze with its easy empty bag that keeps your hands clean and a unique wall mounting feature that allows for grab-and-go convenience. The MAX Li can be attached to most standard pool poles for extended reach, cleaning large areas with its removable 10.5"-inch vacuum head or spot cleaning when the vacuum head is detached.

Named Pool & Spa News Reader's Choice Best New Product Award, the Pool Blaster® Max Li is the perfect tool for residential pools, spas, and hot tubs. It's the perfect tool for you!
